Major Project

I had done major project on “SCISSOR LIFT WITH TROLLEY”

- The main objective of this project is to create a mechanism to reduce the inconvenience cause when lift the simple or heavy load by the workers which size and power depend upon the demand of the customer.
- In this we use the scissor pattern to lift the load because in this pattern the load is distributed in whole body and there is no damage occurs in the instrument.

Internship

Worked as mechanical trainee with DEEPAK MANUFACTURING PVT. LTD. As a part of engineering curriculum. (Duration-1 month)

- I had learn about the injection moulding process
- I gain some knowledge about injection moulding machine
- I had learn about how to check the quality of the product and what are the type of defects occurs in product
- Gain some knowledge about the raw material
